DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/18/04 has been entered.

Election/Restrictions

2. Applicant's election without traverse of Figure 1, claims 1-5 in the reply filed on 10/6/03 is acknowledged.
3. Claims 6-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected embodiment, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/6/03.

Priority

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2613

6. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimizu et al (JP 8-18955) for the same reasons as set forth in Section 7 of the previous office action, dated 5/22/03.

Response to Arguments

7. Applicant's arguments filed 6/18/04 have been fully considered but they are not persuasive. Applicant asserts on pages 4-6 of the Remarks that Shimizu et al fails to teach supplying parameters to the plurality of coding sections. However, Figure 9 of Shimizu et al illustrates the concept of such control means 108-111 supplying quantization parameters to the plurality of coding sections 119-122, respectively.
